

UpsideDown

Presents Trunky

– latest fun educational game for kids by UpsideDown Games

TRUNKY LEARNS NUMBERS

TRUNKY LEARNS LETTERS

Introduction

Do you want your children to learn as they play? So do we at UpsideDown Games!

Trunky, the elephant, needs your help to retrieve his beloved cake that got away. As he chases his cake through the forest, he practices spelling and arithmetic. *Trunky Learns Letters*, targeted for early readers, begins with smaller words and gradually moves on to practicing Dolch sight words, which are crucial for proper reading development. *Trunky Learns Numbers* allows kids to practice their math skills while playing the game. You can expect the two Trunky games to be available on iTunes and Android from October 17th, 2011 for just \$1.99 (\$2.99 for the Danish version). For a preview, check out our video or visit our website.

About UpsideDown Games

UpsideDown Games aims to make fun learning games for young children by leveraging years of experience in the field. The team behind has won several awards over the years and is headed by Simon Egenfeldt-Nielsen.

UpsideDown Games is subsidiary of Serious Games Interactive, which is a research-based award-winning company that has developed games for several years, gaining attention from major news outlets, such as CNN, BBC, Washington Post, Le Monde, Spiegel, and El Pais.

Gameplay

Jump! Look out! Aah turtles! Help Trunky collect letters for each of the words he gets in *Trunky Learns Letters*. You can choose from 3 levels of difficulty and feel your skills improve! In *Trunky Learns Numbers*, you can show off your math skills while dashing out of trouble's way!

Trunky Learns Numbers and *Letters* are only the beginning of the fun educational games coming up from our award-winning team. Do watch out for more games coming your way!
